Profile

Dedicated third year Computer Science undergraduate on track to achieve a First Class degree and seeking a 2026 graduate role. Recently applied my technical skills during a seven week internship, contributing to a full stack web application by designing frontend interfaces, structuring backend databases and integrating third-party APIs. This hands-on experience, together with university projects, has helped me apply theoretical knowledge to practical development. A proactive learner who thrives on challenges, I am eager to bring my problem solving skills and strong foundation in web development to a collaborative team.

EDUCATION
